User can choose the menu options as per requirement

The screenshot displays a trading software interface with a dark theme. At the top, there's a header bar with market data for Nifty 50, DHAANYA, Nifty Bank, and SMLCAP. The main area is divided into two panels: 'Market Watch' on the left and 'Trade Book' on the right. The 'Market Watch' panel shows a table with columns for Exchange, Trading Symbol, Action, and LTP Price. The 'Trade Book' panel shows a table with columns for Exchange, NEST Order N, Spread Refer, Trading Synt, Order Type, and Request. On the right side, there's a vertical menu bar with various options. A red arrow points from the text 'Need to click on here for open the menu bar' to the 'Click here for Menu' button at the top of the menu bar. Another red arrow points from the text 'Can add anything which need to be added, just click on the desired menu type. And window will appear on screen' to the 'Place Spread Order' option in the menu bar.
